Economists

Megan Geddis

Meg is currently a Project Manager/VISTA Leader with Spirit of the Sun in Westminster, Co.. She attained her Master of International Business at the Darla Moore School of Business at the University of South Carolina. Before beginning her Master's studies, Meg served in the Peace Corps in Benin, West Africa (2015 - 2017) as a Community Economic Development Advisor and member of the Peace Corps Benin Food Security Committee. She obtained her Bachelor's in Business Management and Marketing from the University of South Carolina.

Through her Master's studies and current research, Meg has specialized knowledge of multinational corporation operations and large dataset analysis, particularly pertaining to agricultural value chains in Sub-Saharan Africa. She plans to use this knowledge, in conjunction with her on-the-ground experience in sustainable agricultural systems gained through Peace Corps, in pursuit of a career in the food security sector.

Katherine (Katie) Love

Katie is an MBA candidate with the University of Virginia’s Darden School of Business. Her studies focus on innovation, entrepreneurship, and design thinking.

Prior to business school, Katie worked as a Senior Consultant at Deloitte Consulting in its Federal Strategy and Operations practice. There she designed and led large integration, collaboration, and strategic efforts for the public sector. She designed an “Airport of the Future” thought piece, developed a transformative diversity program for millennial women, and pursued two certifications from Harvard University on Data Visualization and Developing and Executing Innovation.

She holds a Bachelor’s Degree from Furman University where she delivered the graduation address and graduated Magna Cum Laude with a BA in Economics. Here she conducted academic research at both Cornell and Furman University with resulting publications in the Journal of Hospitality Management and highlights featured in The New York Times, The Oprah Magazine, and Women’s Health.

Through her background in Federal consulting, her current studies in business innovation, and her experience with academic research, Katie is uniquely positioned to design an improved intersection between the private and public sector. Katie will return to Deloitte in the fall of 2018 to create stronger integration points between the government and business.

Jeannelle Scheper, MA, OLY

Jeannelle is a recent graduate of the Darla Moore School of Business at the University of South Carolina, with a a Master of Arts in Economics. She is currently completing a Certification of Applied Statistics at the same institution. Whilst completing her studies, Jeannelle also competes as a professional athlete in the sport of Track and Field, having represented her country Saint Lucia at the 2016 Olympic Games in Rio.

With directed studies in Sustainable Development Economics, Jeannelle takes a focus on transitioning small island states to renewable energy sources. She draws experience from working with LUCELEC, St. Lucia's National Electricity company, and various courses in sustainable energy development. Jeannelle plans to continue her academic training by completing a doctoral degree in Sustainable Development, with which she hopes to shape her career in the field.

Lawyers

Christopher (“Chris”) M. Campbell, Esq., LL.M, ACI Arb.

Chris is a U.S. based attorney for the firm Willoughby & Hoefer, P.A. in Columbia, South Carolina where he practices governmental relations law, contract law, international business development and various matters regarding alternative dispute resolution. Chris specializes in international commercial arbitration and other forms of dispute resolution. Prior to practicing for Willoughby & Hoefer he served as the inaugural law clerk to the Honorable Jocelyn T. Newman in the 5th Circuit of South Carolina.

Throughout his academic training, Chris attained: 1) Undergraduate: Marketing & Management (B.A.) from the Darla Moore School of Business at the University of South Carolina, and 2) Graduate: Juris Doctor from the South Carolina School of Law, and LL.M. at Tsinghua University. Aside from his studies in the United States, Chris studied at the Gray’s Inn Court in London, and in Beijing, China where he worked for two Chinese Law firms as part of those firms Mergers & Acquisition and international arbitration teams.

Chris specializes in private international law, in particular commercial arbitration. He has spoken at multiple conferences and written articles on the topic.

Chris has signed on to the Stockholm Treaty Lab because he believes that protecting the global environment is a pressing and tangible challenge facing the human race and would rather take an active role in the discussion and be part of finding viable solutions.

Saumya Chaudhari

Saumya is an Advocate and Associate at the Enviro Legal Defence Firm in New Delhi, India practicing environmental law at the Supreme Court of India as well as the National Green Tribunal, New Delhi. She graduated from the premier National Law University at Bhopal in India as the Convener of the Environmental Law Cell at the University for three years in a row, spearheading the initiatives of the student body by addressing local environmental issues and generating awareness amongst the masses and rural communities.

She completed her dissertation on the topic *'Moving from Corporate Social Responsibility to Corporate Environmental Responsibility'* and published 4 academic papers on the subject of India's REDD+ (Reducing Emissions from Deforestation and Forest Degradation) Readiness. She has also secured certifications from several courses on different aspects of environmental law, policy and sustainable development.

During her university studies she actively participated in multiple international moot court competitions. The competition subjects ranged from civil and humanitarian law to environmental law. She also participated in the 22nd William C. Vis International Arbitration Moot at Vienna representing her University at the arbitration moot.

She has since coached her University team for an International moot court competition (D.M. Harish International Memorial Moot Court) in 2018 and also adjudicated a National moot court competition on criminal law (Juris Corp Criminal Trial Advocacy Moot) in 2017.

She seeks to practice and further specialize in national and international environmental law.

Catarina Lourenço

Catarina grew up in a small Portuguese inland village, Proença-a-Nova, in an area that is commonly called inner pine forest, where, over the top of small hills and mountains, wind farms have emerged over the last few years.

At 18 she moved to Coimbra where she completed her Law studies at the University of Coimbra. After that she went on to live in Lisbon, and started reading a master's degree in business law from the Portuguese Catholic University. Following this, Catarina joined a law firm and worked during two years at a local public entity, where she worked mainly with public procurement and contracts.

Catarina is a lawyer member of Portuguese Bar Association since October 2017 and currently works as a legal advisor at a company specializing in renewable energy consulting, which has developed extraordinary projects for the use of renewable energy sources and electrification of rural areas in underdeveloped countries all over the world.

Even though Catarina was born in a small country with some renewable energy potential, she believes that everything is a matter of resource management and investment, and the future of the planet depends on a coordinated effort of States and citizens. Catarina has the conviction that everything we get today just makes sense if it can be used in the future and that we have a huge responsibility to the next generations and we must guarantee the sustainability of our planet.

Ana Coimbra Trigo

Ana Coimbra Trigo is an Associate at PLMJ – Law Firm, in Lisbon, Portugal.

Dealing mostly with domestic and international arbitration proceedings with the PLMJ Arbitration team, Ana also consults with Chinese clients regarding investment and corporate matters due to her fluency in Mandarin Chinese.

Besides holding an undergraduate degree in Law from the University of Coimbra and an L.L.M. in European and International Law from the China-EU School of Law in Beijing, Ana has also completed post-graduate studies focused on the practice of international arbitration in both Portugal and Portuguese-Speaking Countries hosted by the University of Law in Lisbon.

In 2015, Ana competed in the 13th Vis East Moot (Hong Kong), and went on to serve in the moot as an arbitrator in Vienna, and as an MAA delegate to the UNCITRAL Working Group on International Arbitration in both the New York and Vienna meetings. More recently, in 2017, Ana authored several articles and was also selected as a Mentee for the Young-ICCA Mentoring Program, currently being mentored by Professor Albert Jan van den Berg.

With her participating in the Stockholm Treaty Lab, Ana hopes to provide a useful tool for the international community to address the growing concern for the well-being of the planet.

Anna M. Williams, Esq.

Anna is an attorney for the firm Williams, Stitely & Brink, P.C. in Lexington, South Carolina where she practices personal injury law, contract law, and other areas of plaintiff's civil litigation. Anna is also serving her third year as Social Chair for her local bar association.

Anna has numerous academic achievements, among them earning the distinction of Phi Beta Kappa when she completed her undergraduate work at Kenyon College in Gambier, OH, where she graduated with a Bachelor of Arts in Chemistry and concentrations in Environmental Studies and Women's Studies. After receiving her undergraduate degree, she received a Master of Science in Chemistry at the University of Georgia in Athens, GA, followed by a Juris Doctorate at the University of South Carolina School of Law in Columbia, SC.

Anna decided to participate in the Stockholm Treaty Lab because she hoped to contribute in some small way to a meaningful discussion of the future of our planet. It is her belief that such a complex issue requires everyone's attention if it is ever to be fully resolved.

Scientist

Erik Douds

Erik Douds has a specialty in international environmental policy with a mixture of experience in the non-profit, governmental, and private sector. He has been on the ground implementing plans for a national park along the border of South Sudan and Ethiopia; continues to research alongside NASA scientist Dr. Acker with the Giovanni earth observatory satellite system; and has designed environmental programs for energy-related private sector companies in New York City. Topics of knowledge include commercial composting, energy efficiency and commercial energy purchasing, policy recommendations, and market feasibility studies.
